University Application

University application is a rather tricky task because the requirements of each and every college and country are different and understanding them and fulfilling them in the right way needs time and experience.

AbroadShiksha provides a Online University Application Assistance by helping you in filing application form and track your university application by managing all Pre-admission, communication with admission teams of the university.

Scholarship Guidance

What have our student said about our technology

Living in a remote area has a number of disadvantages. The lack of good counselors to guide you and help you throughout the process is one of great importance. Abroad Shiksha online application & tracking system from one dashboard has enabled me to think ahead and helped me land up in good university with scholarship.

I have done several counselling sessions online through platform. The Scholarship guidance session was detailed and interesting. I love the online tracking and application technology from One platform you can make and track application

A very interesting and valuable experience. It really made me think, and I liked how it enabled me to process my applications and track my application from platform.
